

Sakshi Kothari

Data Analyst | Business Intelligence

London, UK | +44 7823 800782 | srkothari10@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Results-driven Data and Finance Analyst with hands-on internship experience transforming raw financial and operational data into actionable business intelligence. Proven track record of automating manual reporting workflows, conducting **GP% variance analysis**, and **building scalable Power BI dashboards** that accelerate decision-making for senior stakeholders. Skilled in **SQL, Python, DAX, and Power Query**, with a finance domain understanding that bridges technical data work with commercial outcomes.

CORE SKILLS

- Analytics & BI:** Power BI (DAX, Power Query), SQL, Tableau, Excel (Pivot Tables), KPI Reporting, Dashboard
- Programming:** Python (Pandas, NumPy, Scikit-learn), PostgreSQL, Streamlit, PySpark(basics)
- Data Management:** ETL Pipelines, Data Modelling, Data Validation, API Integration, Git
- Business & Finance:** Financial Forecasting, Variance & Trend Analysis, Budget vs Actuals, FP&A Reporting
- AI Automation & Cloud:** Workflow Automation (n8n), ML (Scikit-learn), AI Analytics, AWS (Spark basics)
- Professional Skills:** Stakeholder Reporting, Data Storytelling, Requirements Gathering, Process Optimization

EXPERIENCE

Finance and Tech Intern – Beko Europe- Peterborough, UK

Feb 2026 – Present

- Eliminated **~30%** of weekly manual reporting effort by automating Excel-to-Power BI data pipelines using Power Query - transforming **10,000+ row datasets** into repeatable, auditable workflows that reduced the risk of human error in financial reporting.
- Surfaced **margin anomalies and escalation triggers by analysing GP% variances** across business entities, delivering findings directly to senior stakeholders and identifying areas requiring process and control improvements.
- Built KPI monitoring dashboards and trend analysis models to support FP&A reporting cycles, enabling the finance team to track performance deviations, forecast more accurately, and act on data-driven signals faster.

AI & Data Intern – YCX - Remote / London, UK

Apr 2025 – Aug 2025

- Reduced manual data preparation time by **40% by engineering automated multi-source data pipelines using n8n and AI** - delivering cleaner, more reliable datasets that directly improved analytical output.
- Accelerated operational analytics by building AI-powered data enrichment workflows that compressed processing time from hours to minutes, enabling the team to iterate on insights significantly faster.

PROJECTS

E-Commerce Customer Behavior | Business Intelligence

- Developed end-to-end analytics pipeline (**Python, SQL, Power BI**) for **10K+** e-commerce transactions, identifying churn drivers and retention patterns.
- Delivered a customer segmentation model with LTV scoring that pinpointed the top 15% of high-value customers, giving the marketing team a clear, data-driven target for retention investment.

Profitability & Performance Analysis | Predictive Analysis & BI

- Analysed **12M+** sales and **2M+** purchase records to build a vendor-product profitability model, tracking margin%, GP, and stock turnover - providing a single source of truth for commercial performance.
- Identified **198** high-margin, low-sales products, enabling targeted promotions that increased revenue potential.
- Detected **66%** supplier concentration risk, supporting procurement diversification and risk mitigation strategies.

EDUCATION

Queen Mary University of London

Master's Big Data Science (**Distinction**)

London, UK

Sep 2025

Relevant coursework: Machine Learning, Statistical Modelling, Data Visualisation, Cloud Computing

SIES College Of Science, Commerce and Arts

BSc Computer Science (**Distinction - 9.7/10 CGPA**)

Mumbai, India

May 2024

CERTIFICATIONS

- Business Intelligence with Power BI and Tableau** – Udemy (2024)
- SQL Associate** – DataCamp (2025)
